Today Michelle the lifesaver came to our school to teach us to be safe around water.

Michelle explained that edges of rivers can crumble in or you can fall in. She also said if you grab a stick and put it in the water and the current is flowing very fast you will be going with it down the river.

Then people held up the flags that we swim between and the shark flag and the surfing flag.

Then a boy named Liam had to feel into a black box and feel what was in there, there was sticks, rocks, water and bottles. Then the football fell in so they just left it. It was cool.
