California Gully Primary School

CARE ARRANGEMENTS FOR ILL STUDENTS AND STUDENTS WITH MEDICAL CONDITIONS
POLICY & PROFORMAS

All children have the right to feel safe and well, and know that they will be attended to with due care when in need of first aid. The Care Arrangements are to be read in conjunction with the California Gully Primary School’s First Aid Policy which outlines the school’s responsibility and procedures in respect of our “responsibility to provide equitable access to education and respond to diverse student needs, including health care needs”.

California Gully Primary School will:

- administer first aid to children when in need, in a competent and timely manner.
- communicate children’s health problems to parents when considered necessary.
- provide supplies and facilities to cater for the administering of first aid.
- maintain a sufficient number of staff members trained with a level 2 first aid certificate.

Implementation:

- A sufficient number of staff (including an administration staff member) to be trained to a level 2 first aid certificate, and with up-to-date CPR qualifications.
- A first aid room will be available for use at all times. A comprehensive supply of basic first aid materials will be stored in the first aid room.
- First aid kits will also be available in the photocopy/resource room.
- Supervision of the first aid room will form part of the daily yard duty roster. Any children in the first aid room will be supervised by a staff member.
- All injuries or illnesses that occur during class time will be referred to the administration staff or an Education Support Officer who will manage the incident. All injuries or illnesses that occur during recess or lunch breaks, will be referred to our First Aid trained staff.
- A confidential up-to-date register is located in the first aid room will be kept of all injuries or illnesses experienced by children that require first aid.
- All staff will be provided with basic first aid management skills, including blood spills, and a supply of protective disposable gloves will be available for use by staff.
- Minor injuries only will be treated by staff members on duty, while more serious injuries-including those requiring parents to be notified or suspected treatment by a doctor - require a level 1 or 2 first aid trained staff member to provide first aid.
- Any children with injuries involving blood must have the wound covered at all times.
- No medication including headache tablets will be administered to children without the express written permission of parents or guardians.
- Parents of all children who receive first aid will receive a completed form indicating the nature of the injury, any treatment given, and the name of the teacher providing
the first aid. For more serious injuries/illnesses, the parents/guardians must be contacted by the administration staff so that professional treatment may be organised. Any injuries to a child’s head, face, neck or back must be reported to parents/guardian.

- Any student who is collected from school by parents/guardians as a result of an injury, or who is administered treatment by a doctor/hospital or ambulance officer as a result of an injury, or has an injury to the head, face, neck or back, or where a teacher considers the injury to be greater than “minor” will be reported on Department of Education Accident/Injury form LE375, and entered onto CASES.
- Parents of ill children will be contacted to take the children home.
- Parents who collect children from school for any reason (other than emergency) must sign the child out of the school in a register maintained in the school office.
- All teachers have the authority to call an ambulance immediately in an emergency. If the situation and time permit, a teacher may confer with others before deciding on an appropriate course of action.
- All school camps will have at least 1 Level 2 first aid trained staff member at all times.
- A comprehensive first aid kit will accompany all camps, along with a mobile phone.
- All children attending camps or excursions will have provided a signed medical form providing medical detail and giving teachers permission to contact a doctor or ambulance should instances arise where their child requires treatment. Copies of the signed medical forms to be taken on camps and excursions, as well as kept at school.
- All children, especially those with a documented asthma management plan, will have access to Ventolin and a spacer at all times.
- A member of staff is to be responsible for the purchase and maintenance of first aid supplies, first aid kits, ice packs and the general upkeep of the first aid room.
- At the commencement of each year, requests for updated first aid information will be sent home including requests for any asthma, diabetes and anaphylaxis management plans, high priority medical forms, and reminders to parents of the policies and practices used by the school to manage first aid, illnesses and medications throughout the year.
- General organisational matters relating to first aid will be communicated to staff at the beginning of each year. Revisions of recommended procedures for administering asthma, diabetes and anaphylaxis medication will also be given at appropriate times.
- It is recommended that all students have ambulance cover.

The attached Example pro formas (Diabetes / Epilepsy) are also to be read in conjunction with the school’s First Aid Policy which outlines the school’s responsibility and procedures in respect of our “responsibility to provide equitable access to education and respond to diverse student needs, including health care needs”. Confidential records of all students with specific health needs are maintained securely in the general office for reference as required. A First Aid Register is also maintained noting ailments and treatment for all presenting students.

**Condition Specific Medical Advice Form**

**for a student with Diabetes**

This form is to be completed by the student’s medical/health practitioner providing a description of the health condition and first aid requirements for a student with a health condition. This form will assist the school in developing a Student Health Support Plan which outlines how the school will support the student’s health care needs.

| Name of School: |  
| Student’s Name: ___________________________ | Date of Birth: ___________________________ |
| MedicAlert Number(if relevant): ______________ | Review date for this form: ________________ |

**Description of the condition**

**Diabetes Management**

Please provide relevant details in relation to the student's Diabetes management.

**Student self management**

Is this student usually able to self manage their own diabetes care?

- [ ] Yes
- [ ] No

If no, please provide details in relation to how the school should support the student in developing self-management.

**Relevant issues**

Please outline any relevant issues in relation to attendance at school and learning as well as support required at school.

**First Aid – Signs of Hypoglycaemia (low blood glucose)**

Below is a list of observable signs that school staff will look for in relation to a hypoglycaemia. Please provide comment, if required.

**Mild signs:** sweating, paleness, trembling, hunger, weakness, changes in mood and behaviour (e.g. crying, argumentative outbursts, aggressiveness), inability to think
**Description of the condition**

- Clearly, lack of coordination

**Moderate signs:** inability to help oneself, glazed expression, being disorientated, unaware or seemingly intoxicated, inability to drink and swallow without much encouragement, headache, abdominal pain or nausea.

**Severe signs:** inability to stand, inability to respond to instructions, extreme disorientation, inability to drink and swallow (leading to danger of inhaling food into lungs), unconsciousness or seizures (jarring or twitching of face, body or limbs)

---

**Recommended support**

Please describe recommended care

If additional advice is required, please attach it to this medical advice form

---

**First Aid – Hypoglycaemia**

The following is the first aid response that School staff will follow:

<table>
<thead>
<tr>
<th>Observable sign/reaction</th>
<th>First aid response</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mild / Moderate Hypoglycaemia signs</strong></td>
<td>Give glucose immediately to raise blood glucose (e.g. half a can of 'normal' soft drink or fruit drink (with sugar), or 5 – 6 jelly beans.).</td>
</tr>
<tr>
<td></td>
<td>Wait and monitor for 5 minutes.</td>
</tr>
<tr>
<td></td>
<td>If there is no improvement, repeat giving glucose (e.g. half a can of 'normal' soft drink or fruit drink (with sugar), or 5 – 6 jelly beans.).</td>
</tr>
<tr>
<td></td>
<td>If the student's condition improves, follow up with a snack of one piece of fruit, a slice of bread or dried biscuits only when recovered.</td>
</tr>
<tr>
<td><strong>Severe Hypoglycaemia signs</strong></td>
<td>If unconscious, maintain Airway, Breathing and Circulation while waiting for the ambulance.</td>
</tr>
<tr>
<td></td>
<td>Never put food/drink in mouth of person who is unconscious or convulsing. The only treatment is an injection of glucoses into the vein (given by doctor/paramedic) or an injection of Glucagon.</td>
</tr>
</tbody>
</table>

---

- If unconscious, maintain **Airway**, **Breathing** and **Circulation** while waiting for the ambulance.

- Never put food/drink in mouth of person who is unconscious or convulsing. The only treatment is an injection of glucoses into the vein (given by doctor/paramedic) or an injection of Glucagon.
**First Aid – Hypoglycaemia**

If you anticipate the student will require anything other the first aid response noted above, please provide details, so special arrangement can be negotiated.

**Description of the condition**

**First Aid – Signs of Hyperglycaemia (California Gully Primary blood glucose)**

Below is a list of observable signs that school staff will look for in relation to Hyperglycaemia. Please provide comment, if required.

Sings for this condition will emerge over two or three days and can include:

- frequent urination
- excessive thirst
- weight loss
- lethargy
- change in behavior

**Recommended support**

Please describe recommended care

If additional advice is required, please attach it to this medical advice form.
**Description of the condition**

The school will provide a standard first aid response and will call an ambulance if any of the following is observed or reported:

- Rapid, laboured breathing
- Flushed cheeks
- Abdominal pains
- Sweet acetone smell to the breath
- Vomiting
- Severe dehydration.

Please provide comment, if required.

**Recommended support**

Please describe recommended care

If additional advice is required, please attach it to this medical advice form.

<table>
<thead>
<tr>
<th>Seizure Types</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Please California Gully Primary light which seizure types apply:</strong></td>
<td>Please indicate typical seizure frequency and length, and any management that is a variation from standard seizure management.</td>
</tr>
</tbody>
</table>

- **Partial (focal) seizures**
  - Which side of the brain is affected?

- **Simple partial**
  - Staring, may blink rapidly
  - Only part of the brain is involved (partial)
  - Person remains conscious (simple), able to hear, may or may not be able to speak
  - Jerking of parts of the body may occur
  - Rapid recovery
  - Person may have a headache or experience sensations that aren’t real, such as sounds, flashing light, strange taste or smell, ‘funny tummy’ These are sometimes called an aura and may lead to other types of seizures.

- **Complex partial**
  - Only part of the brain is involved (partial)
  - Person staring and unaware. Eyes may jerk but may talk, remain sitting or walk around
  - Toward the end of the seizure, person may perform unusual activities, eg chewing movement, fiddling with clothes (these are called automatisms)
  - Confused and drowsy after seizure settles, may sleep.

- **Generalised seizures**
  - **Tonic clonic**
    - Not responsive
    - Might fall down/cry out
    - Body becomes stiff (tonic)
    - Jerking of arms and legs occurs
    - May be red or blue in the face
    - May lose control of bladder and/or bowel
    - Tongue may be bitten
## Description of the condition

<table>
<thead>
<tr>
<th>Condition</th>
<th>Symptoms</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clonic</td>
<td>☐ Excessive saliva, ☐ Lasts 1-3 minutes, stops suddenly or gradually</td>
</tr>
<tr>
<td></td>
<td>☐ Confusion and deep sleep (maybe hours) when in recovery phase. May have a headache.</td>
</tr>
</tbody>
</table>

### Absence
- Vacant stare or eyes may blink/roll up
- ☐ Lasts 5-10 seconds
- ☐ Impaired awareness (may be seated)
- Instant recovery, no memory of the event.

### Myoclonic
- Sudden simple jerk
- ☐ May recur many times.

### Duration

How long does recovery take if the seizure isn't long enough to require Midazolam?

### Person's reaction during and after a seizure

Please comment

### Any other recommendations to support the person during and after a seizure

### Signs that the seizure is starting to settle

Recommended support

Please describe recommended care

If additional advice is required, please attach it to this medical advice form.
# First Aid - Management of Seizures

The following is the first aid response that School staff will follow:

<table>
<thead>
<tr>
<th>&quot;Major Seizures&quot;</th>
<th>&quot;Minor Seizures&quot;</th>
</tr>
</thead>
<tbody>
<tr>
<td>Convulsive seizures with major movement manifestations eg: tonic-clonic, tonic, myoclonic, atonic, and partial motor seizure</td>
<td>Seizures with staring, impaired consciousness or unusual behaviour e.g. complex partial seizures and absence seizures</td>
</tr>
</tbody>
</table>

1. Stay calm
2. Check for medical identification
3. Protect the person from injury by removing harmful objects close to them. Loosen any tight clothing or restraints. Place something soft under their head.
4. Stay with the person and reassure them. Do not put anything in their mouth and do not restrain them.
5. Time the seizure
6. When the seizure is over, roll the person onto their side to keep their airway clear
7. Treat any injuries
8. Consider if an ambulance needs to be called. An ambulance should be called when:
   - The seizure lasts longer than 5 -10 minutes.
   - Another seizure quickly follows
   - The person remains unconscious after the seizures ceases
   - The person has been injured
   - You are about to administer diazepam or midazolam
   - You are unsure
   - The seizure happens in water
   - The person is pregnant or a diabetic
   - The person is not known to have epilepsy.
9. Stay with the person and reassure them, they may be sleepy, confused or combative after the seizure
First Aid - Management of Seizures

If you anticipate the student will require anything other the first aid response noted above, please provide details, so special arrangement can be negotiated.
